

Emerging development principles –

5. Shape densities around proximity to transit – higher densities within 10-15 minute walk from the T.

Emerging development principles –

6. Use new investment to create a place of enhanced social, environmental and economic value.

Emerging development principles –

7. New development should positively affect the quality and quantity of storm water through new parks and best management practices.

Emerging development principles –

8. Reduce anticipated trip growth, balance the transportation environment, and address safety issues.

Emerging development principles –
